

LEVISEALS VENTURES PROPERTY MANAGEMENT PLATFORM

VERSION 1.0

1. PROJECT OVERVIEW

The LevisEals Ventures Property Management Platform is a cloud-based property management system connecting:

1. Property Manager (System Owner)
2. Landlords
3. Tenants

The system enables property listing, tenant onboarding, rent collection through M-Pesa Daraja, lease management, payment tracking, and landlord withdrawals.

The platform follows a multi-tenant architecture where each landlord manages their own properties while the Property Manager oversees the entire ecosystem.

2. USER ROLES

Property Manager

System administrator and platform owner.

Responsibilities:

- Approve landlords
 - Approve contracts
 - Manage platform paybill
 - Monitor all transactions
 - Manage withdrawals
 - View all properties
 - View all tenants
 - Configure platform settings
 - Configure platform fees
-

Landlord

Property owner using the platform.

Responsibilities:

- Register account
 - Verify email
 - Complete profile
 - Sign company contract
 - Upload signed contract
 - Create properties
 - Create blocks
 - Create units
 - Manage tenants
 - View payments
 - Request withdrawals
 - Configure property themes
 - Configure Daraja credentials
-

Tenant

Property occupant.

Responsibilities:

- Register account
 - Verify email
 - Upload identification documents
 - Search available units
 - Request leasing
 - Pay rent
 - Access assigned units
 - View payment history
 - Download receipts
-

3. LANDLORD REGISTRATION

Required Fields:

- Full Name
- Email
- Phone Number

- National ID Number
- Password

System Requirements:

- Email must be unique
- Phone must be unique
- Email verification required
- Password must be encrypted

Status Flow:

PENDING_VERIFICATION

↓

EMAIL_VERIFIED

↓

PROFILE_COMPLETED

↓

CONTRACT_SUBMITTED

↓

APPROVED

4. LANDLORD PROFILE

Required Fields:

- Profile Photo
- National ID Front
- National ID Back
- Physical Address

Optional Fields:

- KRA PIN
 - Company Name
 - Company Address
-

5. CONTRACT MANAGEMENT

The system shall generate a digital contract between:

Leviseals Ventures

and

Landlord

Landlord Options:

Option A

- Digitally sign generated contract

Option B

- Upload already signed contract

Contract Status:

- Pending
- Approved
- Rejected

Only approved contracts can create properties.

6. LANDLORD THEME SETTINGS

Landlord shall configure:

- Property Logo
- Primary Color
- Secondary Color
- Background Image
- Property Display Name

The theme shall automatically apply to tenants assigned to the landlord's properties.

7. DARAJA CONFIGURATION

Landlord may choose:

Option A

Use Platform Paybill

Option B

Use Personal Paybill/Till

Required Fields:

- Shortcode
- Consumer Key
- Consumer Secret
- Passkey

Status:

- Pending Approval
 - Approved
 - Rejected
-

8. PROPERTY MANAGEMENT

A landlord may create multiple properties.

Property Fields:

- Property Name
 - Description
 - County
 - Town
 - Physical Address
 - Latitude
 - Longitude
 - Video
 - Images
 - Tenant Rules
 - Created Date
-

9. BLOCK MANAGEMENT

A property may contain multiple blocks.

Example:

Block A

Block B

Block C

10. UNIT MANAGEMENT

Each block contains multiple units.

Required Fields:

- Property
- Block
- Unit Number
- Monthly Rent
- Deposit Amount
- Description

Occupancy Status:

- Vacant
 - Pending
 - Occupied
-

11. TENANT REGISTRATION

Required Fields:

- Full Name
- Email
- Phone Number
- National ID Number
- Password

Required Uploads:

- ID Front
- ID Back
- Selfie Photo

Verification:

- Email OTP Verification

Status:

- Pending Verification
 - Verified
 - Approved
-

12. UNIT DISCOVERY

Tenants can browse:

- Available Properties
- Available Units
- Property Images
- Property Videos
- Property Rules
- Monthly Rent

Filters:

- County
 - Town
 - Price Range
-

13. LEASE REQUESTS

Tenant selects a unit.

System creates:

Lease Request

Status:

- Pending
 - Approved
 - Rejected
-

14. PREPAID RENT RULE

Before occupying a unit:

Tenant must pay the first month's rent in full.

Example:

Monthly Rent = 10,000

Allowed:

10,000

Not Allowed:

5,000

Activation only occurs after full payment.

15. ENTRY CODE SYSTEM

After payment and approval:

System generates a unique entry code.

Example:

GVA-A101-K8P92

Code is linked to:

- Tenant
- Unit

A tenant may possess multiple entry codes.

Each entry code unlocks a specific unit dashboard.

16. MULTI-UNIT SUPPORT

A tenant may rent:

- One House
- Multiple Houses
- House + Shop
- Multiple Shops

The system must support multiple active units per tenant.

17. TENANT DASHBOARD

Tenant shall view:

- Active Units
- Monthly Rent
- Outstanding Balance
- Payment History
- Receipts

The dashboard must allow switching between units.

18. PAYMENT SYSTEM

Payment Gateway:

M-Pesa Daraja API

Supported Flow:

C2B

Tenant → Platform

System Records:

- Amount
- Phone Number
- Receipt Number
- Date
- Unit

19. RECEIPT SYSTEM

Each payment shall generate:

- Receipt Number
- Amount
- Unit
- Property
- Tenant
- M-Pesa Receipt
- Timestamp

Receipts shall be downloadable as PDF.

20. MONTHLY BILLING ENGINE

The system shall automatically generate monthly invoices.

Example:

July Rent = 10,000

Paid = 10,000

Balance = 0

August Invoice Automatically Generated

If prepaid funds exist:

The system shall automatically apply available balance to future invoices.

21. LANDLORD WALLET

The system maintains landlord balances.

Sources:

- Tenant Rent Payments

Deduct:

- Platform Fees

Display:

- Total Earnings
 - Available Balance
 - Pending Withdrawals
-

22. LANDLORD WITHDRAWALS

Landlord may withdraw funds to:

- M-Pesa Number
- Till Number
- Paybill

Withdrawal Status:

- Pending
- Processing
- Completed
- Failed

The system shall use Daraja B2C APIs.

23. AUDIT REQUIREMENTS

The system shall record:

- Registration Activities
- Lease Approvals
- Payments
- Withdrawals
- Contract Approvals

All records must be timestamped.

24. VERSION 1 EXCLUSIONS

The following modules shall be postponed:

- Notifications
- WhatsApp Integration
- SMS Integration
- Farming Module
- Chama Module
- Advertisement Module
- Community Board
- Peer Messaging
- Analytics Dashboard

These modules will be implemented in Version 2.
